The meet at Los Angeles has in terested the people of two continents and it is everywhere conceded that the achievements there have been thing short of astonishing. In spite of legal technicalities that rival aviators sought to interpose, machines heavier than air have been guided with perfect mastery through all sorts evolutions, and at atupendous heights. In airship marvels one may ne longer tell what a day may bring forth, and the meet on the coast has country that should inspire Americans to excel the world in adapting this rublime sport to practical purposes and everyday efficiency.

There is a general expression of regret that the Wrights keep out of these contests, since their claim to first place among the avlators has been won by their genius and their skill in this country and abroad.

made in the name of humanity in any country. The bulletin of the National Association for the Study and Prevention of Tuberculosis shows that over \$8,000,000 has been expended; that in the year 1909 over 10,000,000 pieces of literature were distributed, and that 117,312 patients were treated saries and anti-tuberculosis associa-tions. By far the largest amount of

292,289.77 being expended in this way. The anti-tuberculosis associations spent \$975,889.56, the tuberculosis dis-

tients in sanatoria and hospitals, \$5.7292,883.75 being expended in this way.

The anti-tuberculosis associations spent \$375,883,56, the tuberculosis dispensaries and clinics \$640,474.64, and the various municipalities, for special tuberculosis work, spent \$1,111,957,52.

The anti-tuberculosis associations distributed the most literature, spreading far and wide \$,400,000 copies of circulars pamphlets and other printed matter for the purpose of educating the public about consumption. The health departments of the different cities also distributed more than 1,056,000 copies, which, with the work done by state departments of health, brings the number of pieces distributed during the year well over 10,000,000. The largest number of partients treated during the year was by the dispensaries, where \$1,586 patients in the same of the counter and silver plate, cast an eye at they kept their few good diamonds, and called to the office as slower their few good diamonds, and called to the office at the safe where they kept their few at they kept their few good diamonds, and called to the office at the safe where they kept their few good diamonds, and called to the office at the safe where they kept their few at they kept their few good diamonds, and called to the office at the safe where they kept their few good diamonds, and called to the office at the safe where they kept their few good diamonds, and called to the office at the safe where they kept their few good diamonds, and called to the office at the safe where they kept their few good diamonds, and called to the office at the safe where they kept their few good diamonds, and called to the office at the safe where they kept their few good diamonds, and called to the office at the safe where they kept their few good diamonds, and called to the office at the safe where they kept their few good diamonds, and called to the office at the safe where they kept their few good diamonds, and called to the office at the safe where they kept their few good diamonds, and called t

Vindicated Again.

Now that 1910 has opened up with a good ice-crop, we may confidently expect that it has other good things in store for us.

Now we are informed that Mr. Madriz, the new president of Nicaragua, after careful investigation, declares that the putting to death of Messrs. Greec and Cannon by Mr. Zelaya was illegal, that the consequent resentment which was shown by the government and people of the United States was justified, and that he feels it incumbent upon himself to express to our government his profound regret at the tragic incident.

This message from Mr. Madriz should act as a stinging rebuke to those in this country who, for fac-There is no doubt that "the man of the house" is an impediment in many cases of wemen's staying away from the polls, and if the relation of the sexes to life were reversed perhaps the male would show as much of a shrinkage. The conditions which keep women away from the polls who have registered would not look well in print, and the meanest of men have shame enough not to want them print-ed.

The fact that a man's fears are groundless when he is up in a balloon does not in the least prove soothing when he is in peril.
